## **ECORASTER E50 FIRE LANE STANDARD**

A driving surface of **Ecoraster E50** filled with gravel and installed on a 6" base of gravel on compacted subgrade is capable of supporting and exceeding the imposed load of a fire apparatus weighing at least 75,000 pounds (34,050kg) according to the 2010 Fire Code of New York State (see Exhibit A).

**Ecoraster E50** supports loads exceeding AASHTO H-20 and HS-20 loading.

**Ecoraster E50** is tested to DIN 14090 standards and exceeds 20 metric tons per axle and 800 metric tons per square meter when filled with gravel.

Please refer to drawing *ecoraster E50. fire access. gravel. R1* available on our website.

Best regards,

**Adam Isbitsky**  
General Manager
