Guarantee bond for ECORASTER®

Dear Sir/Madam,

For manufacturing our ECORASTER® product range we use polymer plastics, known under the technical term "LDPE".

Our products are subject to constant quality controls and our Company is certified according to ISO 9001.

in addition, TÜV Nord (German technical certification Organisation) checks our products regularly. Load testing is conducted in accordance with DIN 38412, DIN 1072 and DIN EN 124.

The environmental neutrality test is carried out in accordance with DIN 38412. ECORASTER® tiles do not secrete any toxic constituents when they come into contact with water.

As a result of the aforementioned manufacturing controls and tests, we can give you a long-term guarantee valid for 20 years.

This guarantee covers the durability of the raw material used and therefore the durability of the ECORASTER®.

The product is resistant to hot asphalt, petrol, oil, road salt, urine, lactic acid and ammonia and shatterproof at temperatures of -30° to +70°C

This guarantee is subject to a correct and proper installation in accordance with the laying Instructions and compliance with the specified load data as well as specified corresponding correct usage.

Yours faithfully,

PURUS PLASTICS GmbH

Jürgen Manzei  
Managing Director
